

Fiendz™ (@FiendzRIP) is a quirky **sci-fi adventure** built on **Cardano** that takes place in a dystopian future, where the rise of the REKT nuclear-powered smartphone (a phone that never shuts down) creates a world of **braindead social media (web2) zombies**.

OUR MISSION

Our goal is to build **Fiendz™** into a **cross-chain gaming IP** that collaborates with different IPs/projects in the space and to accelerate the transition of **web3 based gaming** to (mobile)gaming.

THE TEAM

Our team is composed of three passionate professionals with the ambition to create a **full-service web3 gaming/entertainment studio**. The daily grind of such a studio really encompasses a lot of our ambition so building this IP with web3 at its core really is a way for us to build out our dreams.
